Reference letter

Celje, 23.03.2014

Dear Mr./Mrs.

"Volunteers contribute 5% of EU GDP annually"

My name is Alen Novit and I am a president of Kultlab Celje Society (Društvo Kultlab Celje), a private, non-governmental and non-profit organization, which is active mainly in the field of culture, social affairs and human rights. Activities of our organization is therefore in relation with social rights and social inclusion, basic human rights, and more inclusive participation in state or local decision making process ; in connection with those two topics we are also performing various cultural activities (e.g. exhibition, design and publishing, shows, etc.).

M.S. is a volunteer at Kultlab Celje for approximately five year now, and during this time I was working with M.S. on some project.

As volunteer, M.S. was responsible for creation of web sites and its designing, and also he was involved in other designing tasks within various projects (designing books, leaflets, posters, etc.). With his computer skills he was also very useful for helping our elder and younger members in their work with computer, so many of them were, with his help, been able to improve their computer skills and knowledge. I can also add that M.S. was actively involved in some international project where he had to communicate in foreign language (English language – reading and writing) - he was able to do that without bigger problems.

I can say that M.S. was very dedicated and committed to all task and duties he had and I can confirm that M.S. has the expertise from different computer skills, especially from the fields of computer programming and design (web programming and design within Joomla and Adobe applications). M.S. is also very skilled with other standard computer applications (Microsoft applications, internet) and he has a good knowledge of English language.

I highly recommend M.S. for work in organizations that needs a professional computer expert, especially for establishing websites and design purpose. M.S. would also be a valuable choice for those who need a teacher/mentor of basic computer skills/applications even in cases when there is English language knowledge required.

In case that you need any additional information about M.S. references, do not hesitate to contact me.

Sincerely

Alen Novit
President
